SKILLS

- Computer knowledgeable. Working with and learning software via hands-on experience and research. Also experienced in installing/uninstalling components in personal computers.
- Problem solving. Working with and solving problems with computers since childhood, a skill that has developed extensively due to the pandemic.
- Committed. Holding myself to a very high standard and expecting the best from myself, while understanding that I need to learn and progress with everything I do.
- Driven by challenge. Excelling in challenging situations by desire to learn and further understand the problem, it's causes, and how to most efficiently solve it.

ACTIVITIES

I enjoy working with computers. Whether it be helping family troubleshoot their PC problems, making videos, modifying and playing games, or learning new things. It's my passion, and I hope to become even more proficient with different aspects of computers and technology, to better understand how to help people, work more efficiently, and have more fun doing the things we do every day.
